RE: ONGC

Date 8/21/19

Greetings,

I would like thank you for allowing us the opportunity to quote our **Service King** rigs to you. Our company is a family owned and operated business. We go back a long ways in experience in working and building oilfield equipment.

In 1978 we started rebuilding rigs of all types and as time went on we seen many things we did not like and many things we liked led us into the type of rigs we build now. We took the good of all rig manufactures and our experience of working rigs and put together rigs with both by experience of working and operating the many types of produced and designed a rig that has many qualities that is needed in the oilfields of the world.

Number 1, Our rigs are easy to work on and all parts are kept in our main plant in Stroud, Oklahoma.

We offer a rig that not only is easy to repair but has a long life in dependability in operations. Should our rig need repairs we have experts that are ready to go anyplace in the world to service our product. Keeping in mind because our rigs are easy to work on, most repairs can be done by our people on location in the field in your country

Ganth is a very good man in this field. Not only is he selling **Service King** rigs, Ganth has the ability to over see operations of repairs himself. So you are not only dealing with a representative you are dealing with a person who knows the product itself.

I am giving you the names of some of the largest customers and the amount of rigs they have purchased. As you can see some of the customers purchased rigs from us over several years and should prove the customer satisfaction.

We have rigs in many countries such as Poland , Romania , Indonesia , Australia, Ukraine, Brazil, Peru, Bolivia, Ecuador, Mexico as well as the United States

We still are a family owned business and hope to remain this way for a long time to come. Thank you for giving us a chance show you that your trust will not be taken advantage of.

Best regards

Michael Goodman
